

L Accumulation GBP | Data as at 31.12.2024

Fund objectives and investment policy

The fund aims to provide income and capital growth by investing in equity and equity-related securities of UK companies. The fund aims to deliver an income of 7% per year but this is not guaranteed and could change depending on market conditions.

Above is the Investment Objective of the fund. For details on the full fund's Investment Policy please see the KIID.

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment. Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

L Accumulation GBP | Data as at 31.12.2024

10 year return of GBP 10,000

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

Capital risk / distribution policy: As the fund intends to pay dividends regardless of its performance, a dividend may represent a return of part of the amount you invested.

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Currency risk: If the fund's investments are denominated in currencies different to the fund's base currency, the fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates. If the investor holds a share class in a different currency to the base currency of the fund, investors may be exposed to losses as a result of movements in currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used for investment purposes and/ or to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Higher volatility risk: The price of this fund may be more volatile as it may take higher risks in search of higher rewards, meaning the price may go up and down to a greater extent.

Liquidity risk: The fund invests in illiquid instruments, which are harder to sell. Illiquidity increases the risks that the fund will be unable to sell its holdings in a timely manner in order to meet its financial obligations at a given point in time. It may also mean that there could be delays in investing committed capital into the asset class.

Market risk: The value of investments can go up and down and an investor may not get back the amount initially invested.

Maximiser funds: Derivatives, which are financial instruments deriving their value from an underlying asset, are used to generate income (which is paid to investors) and to reduce the volatility of returns but they may also reduce fund performance or erode capital value.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve. As a result of fees being charged to capital, the distributable income of the fund may be higher, but there is the potential that performance or capital value may be eroded.

Synthetic risk & reward indicator (SRI)

LOWER RISK

Potentially lower reward

HIGHER RISK

Potentially higher reward

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed. Please see the Key Investor Information Document for more information.

Information relating to changes in fund manager, investment objective, benchmark and corporate action information

Benchmarks: (If applicable)

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. The fund is not managed with reference to a benchmark. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.

Important information

Costs:

Certain costs associated with your investment in the fund may be incurred in a different currency to that of your investment. These costs may increase or decrease as a result of currency and exchange rate fluctuations.

If a performance fee is applicable to this fund, details of the performance fee model and its computation methodology can be found in the fund's prospectus. This includes a description of the performance fee calculation methodology, the dates on which the performance fee is paid and details of how the performance fee is calculated in relation to the fund's performance fee benchmark, which may differ from the benchmark in the fund's investment objective or investment policy.

For further information regarding the costs and charges associated with your investment, please consult the funds' offering documents and annual report.
