

MGTS IDAD Refined Growth Fund

Factsheet – 01 January 2025

Investment Objective

The objective of the MGTS IDAD Refined Growth Sub-fund (the “Refined Growth Fund” or the “Fund”) is to provide capital growth over any five-year period. The Fund uses structured products to deliver reliable and consistent returns for portfolio managers allocating to alternatives.

Investment Manager Commentary

A good month and another strong year for the fund. We saw some steadier recovery in China/Hong Kong markets (with commensurate gains on investments linked to the region). A nice maturity from a secondary market Investec trade and coupon payments from some of the income notes held were the major contributors to growth in December. The US in particular had a pretty down month, in line with other developed markets; the products in the fund are predominantly structured to deliver returns in flat or ‘down’ markets, so these falls had a minimal effect on the individual assets, or the fund as a whole.

The outlook for global stockmarkets looks less rosy than over the last two years, with some drawdown expected in the US in particular, and a move to more traditional valuation metrics. Interest rates in most economies seem set to stay a bit higher for a bit longer too. Against this backdrop, we remain optimistic for fund performance in 2025, expecting growth even against a backdrop of flattish or falling equity markets

Key Facts

Investment Strategy

The investment policy of the Refined Growth Fund is to provide capital growth over any five-year period. The Fund builds on the benefits of using structured product solutions to deliver more reliable and consistent returns for portfolio managers allocating assets to alternatives. By leveraging IDAD's extensive relationships with more than 30 investment-grade issuers, the Fund is able to enhance returns using diversified counterparty credit risk. Introducing traditional investment management skills and experience adds further value and contributes significantly to returns.

Core Holdings

The Fund has a core allocation to index-linked products providing broadly-diversified developed markets exposure. Products will be designed to deliver capital growth even if the underlying equity markets are flat or even fall slightly. These holdings represent around 80% of assets.

Tactical Holdings

A satellite allocation representing up to 20% of assets that are designed to produce higher returns by investing in products linked to a wider range of underlying instruments, such as less-developed equity market indices, sectoral indices, stocks and commodities. This part of the portfolio may become very defensive during periods when the managers are concerned regarding market direction.

Liquidity & exposure management

The Fund may also invest in ETFs to manage liquidity and geographic exposures.

Portfolio Analysis

Average cover to capital loss is the notional-weighted average distance to knock-in (capital-at-risk) barriers, expressed as a percentage of barrier level. Average cover to capital gain is the notional-weighted average distance to autocall or coupon barriers as a percentage of barrier level. A positive percentage indicates that, on average, market levels are above barrier levels.

Average cover to capital gain: -12.63%
Average cover to capital loss: 36.00%

Performance Scenario Analysis

This table is designed to demonstrate future performance of the Fund in different performance scenarios and is based on the current underlying assets held (the structured product underlyings, ETFs and cash). Actual performance will depend on actual market conditions and will also be affected by the changing make up of the portfolio over time.

Move in the Underlying Assets	-20%	-10%	0%	10%	20%
Over 3 months	-15.78%	-5.92%	1.70%	6.75%	10.09%
Over 1 year	-11.10%	-1.02%	5.79%	10.74%	12.33%
Over 2 years	-3.78%	5.59%	11.22%	12.24%	14.47%
Over 3 years	2.95%	10.25%	14.95%	12.45%	12.46%
Over 4 years	6.11%	16.04%	17.91%	13.87%	12.81%

RISK WARNINGS

The MGTS/IDAD Funds are subject to normal stock market fluctuations and other risks inherent in such investments. The value of your investment and the income derived from it can go down as well as up, and you may not get back the money that you have invested. Investments in overseas equities may be affected by changes in exchange rates, which could cause the value of your investment to increase or diminish. Capital appreciation in the early years will be adversely affected by Initial Charges, so you should regard your investment as medium to long term. Past performance is not a guide to future performance. Every effort is taken to ensure the accuracy of this data, but no warranties are given.
