# DISCLAIMER

The financial information on Société Générale for its 4<sup>th</sup> quarter and 2021 financial results comprises this presentation and a dedicated press release which are available on the website: <https://investors.societegenerale.com/fr>.

This presentation contains forward-looking statements relating to the targets and strategies of the Societe Generale Group. These forward-looking statements are based on a series of assumptions, both general and specific, in particular the application of accounting principles and methods in accordance with IFRS (International Financial Reporting Standards) as adopted in the European Union, as well as the application of existing prudential regulations. These forward-looking statements have also been developed from scenarios based on a number of economic assumptions in the context of a given competitive and regulatory environment. The Group may be unable to:

- anticipate all the risks, uncertainties or other factors likely to affect its business and to appraise their potential consequences;
- evaluate the extent to which the occurrence of a risk or a combination of risks could cause actual results to differ materially from those provided in this document and the related presentation.

Therefore, although Societe Generale believes that these statements are based on reasonable assumptions, these forward-looking statements are subject to numerous risks and uncertainties, in particular in the Covid-19 crisis context, including matters not yet known to it or its management or not currently considered material, and there can be no assurance that anticipated events will occur or that the objectives set out will actually be achieved.

Important factors that could cause actual results to differ materially from the results anticipated in the forward-looking statements include, among others, overall trends in general economic activity and in Societe Generale's markets in particular, regulatory and prudential changes, and the success of Societe Generale's strategic, operating and financial initiatives.

More detailed information on the potential risks that could affect Societe Generale's financial results can be found in the section "Risk Factors" in our Universal Registration Document filed with the French *Autorité des Marchés Financiers* (which is available on <https://investors.societegenerale.com/en>). Investors are advised to take into account factors of uncertainty and risk likely to impact the operations of the Group when considering the information contained in such forward-looking statements. Other than as required by applicable law, Societe Generale undertakes no does not undertake any obligation to update or revise any forward-looking information or statements.

Unless otherwise specified, the sources for the business rankings and market positions are internal. This presentation includes information pertaining to our markets and our competitive positions therein. Such information is based on market data and our actual revenues in those markets for the relevant periods. We obtained this market information from various third-party sources (publications, surveys and forecasts) and our own internal estimates. We have not independently verified these third-party sources and cannot guarantee their accuracy or completeness and our internal surveys and estimates have not been verified by independent experts or other independent sources

The financial information presented for the financial year ending 31 December 2021 was approved by the Board of Directors on 9 February 2022. It has been prepared in accordance with IFRS as adopted in the European Union and applicable at this date. The audit procedures carried out by the Statutory Auditors on the consolidated financial statements are in progress.

# IFRS 9 MONITORING

## METHODOLOGY APPLIED

As of Q4 21, IFRS 9 parameters were updated in order to keep a prudent approach:

- Updated 4 macroeconomic scenarios, maintaining the conservative adjustments made to take into account both the delay in defaults and the massive State support in the major countries in which we operate
- Change in the weighting applied to each scenario to introduce a countercyclical element in our provisioning methodology
- Additional sector / areas-at-risk adjustments to compensate for more favorable macroeconomic parameters

# METHODOLOGY (1/2)

## 1 – Net banking income

The pillars' net banking income is defined on page 41 of Societe Generale's 2021 Universal Registration Document. The terms "Revenues" or "Net Banking Income" are used interchangeably. They provide a normalised measure of each pillar's net banking income taking into account the normative capital mobilised for its activity.

## 2 – Operating expenses

**Operating expenses** correspond to the "Operating Expenses" as presented in note 8.1 to the Group's consolidated financial statements as 31 December 2020 (pages 466 et seq. of the 2021 Universal Registration Document). The term "costs" is also used to refer to Operating Expenses.

The **Cost/Income Ratio** is defined on page 41 of Societe Generale's 2021 Universal Registration Document.

## 3 – IFRIC 21 adjustment and SRF definition

The IFRIC 21 adjustment corrects the result of the charges recognised in the accounts in their entirety when they are due (generating event) so as to recognise only the portion relating to the current quarter, i.e. a quarter of the total. It consists in smoothing the charge recognised accordingly over the financial year in order to provide a more economic idea of the costs actually attributable to the activity over the period analysed.

The contribution to **Single Resolution Funds** (« SRF ») are part of the charges adjusted from IFRIC 21. It includes the national resolution funds within the EU.

## 4 – Exceptional items – transition from accounting data to underlying data

The Group may be required to provide underlying indicators for a clearer understanding of its actual performance. Underlying data is obtained from reported data by restating the latter to take into account exceptional items and the IFRIC 21 adjustment

The Group restates also the revenues and earnings of the French Retail Banking pillar for PEL/CEL provision allocations or write-backs. This adjustment makes it easier to identify the revenues and earnings relating to the pillar's activity, by excluding the volatile component related to commitments specific to regulated savings.

Details of these items, as well as the other items that are the subject of a one-off or recurring restatement (exceptional items) are given in the supplement (page 30).

## 5 – Cost of risk in basis points, coverage ratio for non-performing loans

The cost of risk or commercial cost of risk is defined on pages 43 and 635 of Societe Generale's 2021 Universal Registration Document. This indicator makes it possible to assess the level of risk of each of the pillars as a percentage of balance sheet loan commitments, including operating leases. The gross coverage ratio for non-performing loans is calculated as the ratio of provisions recognised in respect of the credit risk to gross outstandings identified as in default within the meaning of the regulations, without taking account of any guarantees provided. This coverage ratio measures the maximum residual risk associated with outstandings in default ("non-performing").

# METHODOLOGY (2/2)

## 6 – ROE, RONE, ROTE

The notion of ROE (Return On Equity) and ROTE (Return On Tangible Equity), as well as the methodology for calculating it, are specified on pages 43 and 44 of Societe Generale's 2021 Universal Registration Document. This measure makes it possible to assess return on equity and Societe Generale's return on tangible equity.

RONE (*Return on Normative Equity*) determines the return on average normative equity allocated to the Group's businesses, according to the principles presented on page 44 of Societe Generale's 2021 Universal Registration Document.

The net result by the group retained for the numerator of the ratio is the net profit attributable to the accounting group adjusted by the interest to be paid on TSS & TSDI, interest paid to the holders of TSS & TSDI amortization of premiums issues and unrealized gains/losses accounted in equity, excluding translation reserves (see methodological Note 9). For the ROTE, the result is also restated for impairment of goodwill.

7 – **Net assets and tangible net assets** are defined in the methodology, page 46 of the Group's 2021 Universal Registration Document.

## 8 – Calculation of Earnings Per Share (EPS)

The EPS published by Societe Generale is calculated according to the rules defined by the IAS 33 standard (see page 45 of Societe Generale's 2021 Universal Registration Document). The corrections made to Group net income in order to calculate EPS correspond to the restatements carried out for the calculation of ROE and ROTE. For indicative purpose, the Group also publishes EPS adjusted for the impact of exceptional items and for IFRIC 21 adjustment (Underlying EPS).

9 – The Societe Generale **Group's Common Equity Tier 1** capital is calculated in accordance with applicable CRR2/CRD5 rules. The phased-in ratios include the earnings for the current financial year and the related provision for dividends. The difference between phased-in ratio and fully-loaded ratio is related to the IFRS 9 impacts. The leverage ratio is calculated according to applicable CRR2/CRD5 rules including the phased-in follows the same rationale as solvency ratios.

10 – The **liquid asset buffer or liquidity reserve** includes 1/ central bank cash and deposits recognised for the calculation of the liquidity buffer for the LCR ratio, 2/ liquid assets rapidly tradable in the market (High Quality Liquid Assets or HQLA), unencumbered net of haircuts, as included in the liquidity buffer for the LCR ratio and 3/ central bank eligible assets, unencumbered net of haircuts.

Note: The sum of values contained in the tables and analyses may differ slightly from the total reported due to rounding rules.

All the information on the results for the period (notably: press release, downloadable data, presentation slides and supplement) is available on Societe Generale's website [www.societegenerale.com](http://www.societegenerale.com) in the "Investor" section.
