Monthly commentary

No confettis to close 2022. After a final session of falling prices, a year with many challenges came to an end. 2022 was overshadowed by tightening central bank monetary policy, the war in Ukraine and China's zero-covid policy, benefiting commodities and leaving techs on the sidelines. London came out with a slight gain, while the Nasdaq posted a loss of over 30% for the year. The fund ended the month with a NAV of CHF 101.68, up +1.83% for the year. On 14 December, a new "all time high" of CHF 103.50 was even reached. As an expression of the growing trust, the assets under management also increased by more than 20% to now over 10 million.

Investment policy

The objective of the fund is to provide an efficient investment in a diversified portfolio of structured products of the Barrier Reverse Convertible type based exclusively on equity indices of the major developed countries (so-called multi-index products). This strategy implements a systematic sale of exotic options, thus capturing overvalued risk premiums. The fund aims for absolute capital growth.
